Nicola Wohlgemuth, (1971)

Equipped with a broader spectrum of different talents and abilities than other people, Nicola Wohlgemuth creates an explicable connection between her skills and science.

She has acquired her knowledge with a study of nature, many lectures in the field of medicine, quantum physics, genetics etc. as well as of Traditional Chinese Medicine, the teaching of Indian chakra, Native American traditions and healing methods. Learning the diverse types of massage trained her link between knowledge and its manual application.

In her **therapeutic work** (for over 25 years) she has convinced people with her ability to accurately perceive the causes of blockages and therefore tailor the therapy to be particularly effective.

With the production of the **Rostock-Essences** she has set a milestone in holistic medicine („medicine of the future“). Scientists, researchers, doctors and therapists have learned to appreciate her work, versatility her bright mind as have medicine men and women of indigenous peoples, herbalists or organic farmers as well.

As her special talents let enable her to see vibrations and be able to change their character, she found a way to change those energies / vibes stressing our system into helping ones: the incredible **badges**

What nearly everyone realizes when talking to her is her deep and honest respect for all living beings, life itself and the planet on which we live.

Badges – small but powerful

Practical, affordable and reliable helpers that make everyday life more pleasant. Damaging, disruptive fields are converted into positive energy! Often copied – never equaled! The metal badges are small and handy (3x5cm), easy to take along with frequent changes of location in a stressed environment to take advantage of the protective fields. WLAN and Bluetooth suppression included on all badges.

All our badges build an energetic bubble-like protection field which differ only in the radius of operation. Under certain conditions, this working diameter can be larger, but not smaller! No material can block the effects of our badges, and of course, the retained information cannot be irritated or deleted (MIPES™).

Technical and scientific monitoring since 1992, Over 25 years of success -tested and proofed - easy to handle and wallet friendly.

For the very first time it is possible to use energies from the surrounding areas to help our system cure itself without using a technical device.

In traditional ways to deal with technical fields or geopathic zones many products were designed to delete those energetic fields. The problem is, that all kind of protection is overrun one day and all the energy kept away with that now broken barrier will flood over you. Using the new method our badges have different topics – but never will energy be deleted, only changed!

Tec-Field suppression

As surrounded 24/7 with technical devices getting more almost daily our whole system cannot deal with such a stress. Low affected we have difficulties to keep distance to other people, getting stressed more we cannot make decisions or emotionally react according to the situation until our system is too overloaded and our body also gets ill.

The Tec-field badge builds a spherical „suppression field“ of about 7m diameter. Within this field it smooths out all field peaks in technical oscillation areas. This field is absolutely stable and completely independent

of the number of technical devices within this „sphere“ (50Hz and 60Hz; 110V, 240V to 1 KV). Workplace: Computer (PC, monitor, printer, scanner, etc.), living room (TV, stereo equipment) kitchen (oven, dishwasher, microwave etc.) or waterbeds. Important for water pumps used with pools, ponds, fish tanks.

We recommend to have a Tec Field badge always with you, because under most working or living conditions we are almost permanently surrounded particularly by technical frequencies. Have a look around where you live, work, go shopping, do sports... You will quickly understand what we are talking about.

Space & Tec USB Stick

A super-practical combination for daily use and protection at the same time. A high quality usb-stick (3.0, 8GB red, 32GB yellow)

which cover is programmed as a tec field suppression. More information are stored as well – like having fun at work, protection against getting stolen, longer durability.

Geopath Field Suppression

We know them as E-rays or earth rays, including subterranean running water, Curry lines and Hartmann lines and various tectonic fault lines (dislocations, fracturations and others). Geopathic zones shall never be deleted, because we need these energies for our sense of orientation! But – the impact should never be more than 30% - therefore the Geop. Field badge regulates the impact to the optimal strength making a character-change with all energy that would harm us (some people, weak or oversensitive will only stand e.g. 15%). It is neutralizing all fault lines alone and in all thinkable combinations worldwide. The maximum influence is always limited with 30 %. Field of protection has a diameter of approximately 20m.

Mobile Networks Suppression

Looking out of a window in a town very often those mobile transmission towers can be seen on the top of many, many buildings. Being in the transmission area means to

deal with the radiation as well. It is well known that those frequencies do affect our living system – since the start of mobile transmission especially allergies escalated. We normally cannot escape from being “roasted” – but we can do something to avoid the bad effects on our health. Diameter app. 20 meters.

High Voltaic Suppression (110 kV-800kV).

A humming sound, the atmosphere seems tighter and the feeling of pressure on one's heart are only a few examples how we experience HV. It is clear, considering the iron-centre of our red blood cell, every kind of electrical field will have an effect on these cells. The stronger the field the worse the influence and effects.

A great problem occurs when mobile-transmission devices are fixed on the top of HVDC-distance towers because both kind of frequencies will come into a very strong resonance. Diameter is 20m.

Emeles, MLS – a magical light stream

Emeles builds up a stream of light retaining information. - unbreakable, practical, dishwasher safe, safe for children, handy and cheap - ready to use at any moment and you'll love travelling with it!

The basic idea was creating a cheap and practical product with which you can inform drinking water and charging it with positive time-adequate energy. Now, with Emeles it is possible to introduce any information to anything you can think of: food, water, medicine.... You even can apply MLS onto wounds or

hurting muscles, joints ect. Emeles retains loads of information connected with this special age, further colours, sounds, notes and more. Emeles is an energetical guiding line for this age helping to cope with the changes and overthrows.
